TITLE: GARDENING HOSE REEL

Preliminary Amendment: CLAIM AMENDMENTS

1. (Currently amended) A gardening hose reel comprising:

a main frame, ~~comprised of~~ having a through notch on one end; and

a reel notch, ~~which is~~ placed on the main frame and ~~contains~~ containing an outlet; and

a gardening hose, ~~which is~~ rolled up in the reel notch ~~and which~~; wherein a water inlet

terminal is pulled outward from ~~the~~ a central outlet of ~~the~~ said reel notch and affixed to ~~the~~ a faucet;

wherein the water outlet terminal goes through the through notch on ~~the other~~ another end of the

main frame; ~~the features include:~~ said gardening hose comprising:

a rotary connector, ~~which is~~ installed on the water outlet terminal of the gardening hose at the reel notch outlet segment; wherein, when the water outlet terminal of the gardening hose is pulled outward, the water inlet terminal turns with the rotary connector to inhibit linkage with the water inlet terminal of the gardening hose so as to prevent the gardening hose from having a spiral and twisted shape.

2. (Currently amended) The gardening hose reel defined in Claim 1, wherein said rotary connector is comprised of ~~the~~ a primary connector and ~~the~~ a secondary connector to form a casing which comprises a pivot hole to limit the primary connector; wherein the internal of the secondary

connector is connected to the primary connector, and the external is connected to the water inlet terminal of the gardening hose.

3. (Currently amended) The gardening hose reel defined in Claim 1, wherein said main frame ~~can be~~ is placed on a horizontal rotary frame, ~~which comprises~~ said horizontal rotary frame being comprised of a rear button to be placed on wall; ~~so, the, said main frame can rotate~~ being rotated along pulling direction of the water outlet terminal of the gardening hose for smooth usage.

4. (Currently amended) The gardening hose reel defined in Claim 1, wherein said main frame ~~can also be comprised of~~ is comprised of front and rear frames. ~~The, wherein~~ wherein opposite surfaces of the front and rear frames together form through holes, by using the dual head connector to stabilize the front and rear frames.
